Project Background

The SHG movement in India is the World's largest Community based microfinance programme, benefiting nearly 12 crore households through 100 lakh SHGs (as on 31.03.2019). It has now reached a stage where creating reliable data, based on books maintained by SHGs, may prove to be a game changer and may bring a paradigm shift in the way the hitherto unbanked poor are financed. Realising that IT is paramount for creating 'Digital India', NABARD launched a pilot project for digitization of SHGs titled "EShakti". Further details of the project can be seen at <https://eshakti.nabard.org>

EShakti is designed to capture the demographic and financial profiles of the SHGs as well as the members. It also captures the Aadhaar and EPIC (Electors Photo Identity Card) numbers, etc. of the members. It is a project on digitisation of SHG accounts and to bring SHG members under the fold of Financial Inclusion, thereby enabling them access to wider range of financial services, together with increasing the bankers' comfort in credit appraisal and linkage.

The robust design of the platform creates a rich database which can be used by banks and various Government Departments like Panchayat Raj, Health & Family Welfare, Women and Child Development, Education, etc., which could facilitate in implementation of their schemes. At a later date, even private sector, on selective basis, can use the data for furthering the livelihoods of SHG members by enrolling them as their agents for providing goods and services to the rural market and also implement their CSR activities.
